(54) LEAD STORAGE BATTERY

(57)Abstract:

PURPOSE: To prevent temperature rise due to radiant heat from an engine and heat transfer by conduction from the surroundings.

CONSTITUTION: A heat shield body 8 made up of a thin acid resistant metal layer 6 and a resin layer having subdivided hollows 5 inside is provided at least a part of the external surface of a battery jar with the thin metal layer 6 side out. Radiant heat is reflected by the thin acid resistant metal layer 6 and temperature rise due to conduction and convection is prevented by a resin layer wherein subdivided hollows are provided.

LEGAL STATUS

[Date of request for examination]

[Date of sending the examiner's decision of rejection]

[Kind of final disposal of application other than the examiner's decision of rejection or application converted registration]

[Date of final disposal for application]

[Patent number]

[Date of registration]

[Number of appeal against examiner's decision of rejection]

[Date of requesting appeal against examiner's decision of rejection]

[Date of extinction of right]
